

Food Data Analyst

★ 10 - 20% - available immediately.

We need a highly motivated person with a great passion for sustainability and food to support our team to help ensure the smooth and efficient running of our business and client projects.

At Eaternity we sell an application that enables individuals, institutions and restaurants to calculate and optimize the CO₂-footprint of their own menus and food purchases. By providing an easy accessible and cost-efficient way our application makes it possible to have transparency on the environmental and health impact of our food.

To support the development of our business, we are looking to strengthen our team located in Zurich, Switzerland with a Food Data Analyst that has a great passion for data, food and sustainability.

Are you Interested?

Send your application to Judith Ellens, jellens@eaternity.ch

The position remains open until a suitable candidate is found.

Job Description – Food Data Analyst «Matcher Ninja»

As our Food Data Analyst or „Matcher Ninja“ you will be responsible for the timely and correct processing of food data from our clients to assure the entire calculation of the CO₂-footprint as well as other environmental and health indicators.

The job requires and offers flexibility on working hours as client data can come in irregularly. You are ideally from an environmental sciences or food technology and/or have basic knowledge of LCA.

Responsibilities

- The timely and correct linking of client food data with our environmental and health data and models
- Acquiring and processing additional product specifications from our clients and food producers
- Support with the quality management of processing food data correctly (updating guidelines, documentation of missing products and product synonyms, report bugs and possible improvements on automatization, improve the linking of targeted products etc.)
- Optionally: carrying out basic research on ingredients

Skills

- ★Fluent in German and English
- ★Being able to process data efficiently and precisely
- ★Strong work ethic and discipline
- ★Interest in sustainability, social business and food, together with the motivation that we can change the world.

Attributes we aspire to find:

- ★Background in environmental sciences, food technology or similar studies
- ★Experience in carrying out life cycle assessments
- ★Statistical background and skills
- ★Fluent in French and other languages
- ★Experienced in customer service
- ★Obsession with solutions for a sustainable planet

Benefits

- ★ You will be part of a small, young and skilled team of great people at a **world changing social start-up**.
- ★ You will have flexible working times and are compensated at an hourly rate of CHF 25
- ★ You will collect valuable experience in a start-up team culture and your contribution will make the key difference to Eaternity's success story and the direct **environmental impact** it will have.

About Eaternity <http://www.eaternity.org/about/>

Eaternity has the vision to establish climate friendly meals in society. Our experience and strong scientific expertise along with our solid and extensive CO₂-database, forms the backbone of our organization. We are about to expand our work on a larger scale and targeting more people by developing a web-application.

We are passionate about changing the world through great software and we are looking for exceptional people to join us in that mission. Our approach is to assemble a small, tightly knit collective of extraordinarily talented peers, while pursuing impact and revenue goals typical of larger enterprises. We believe this approach gives individuals greater ownership and input into decisions, and makes for a more efficient and happier workplace.
